

Project Title: Technical Report: Predictive Insights for EduPro

Prepared by: Tanya Kulshreshtha

1. Objective: To transform raw enrollment and transaction data into a predictive dashboard that identifies high-demand course categories and forecasts revenue growth for the EduPro platform.

2. Tools & Technologies: * **Data Visualization:** Power BI Desktop

- **Data Modeling:** Star Schema (Fact and Dimension tables)
- **Analytics:** DAX (Data Analysis Expressions) for KPIs and measures
- **Database:** SQL for initial data structuring

3. Key Insights & Findings: * **Revenue Performance:** Achieved a total revenue of ₹911K with a strong conversion rate of ~36%.

- **Top Category:** Data Science emerged as the leader in total enrollments, suggesting a high market demand.
- **Growth Potential:** The interactive model allows for real-time growth simulations, helping stakeholders plan for a 5-10% increase in course demand.
